

CASE MANAGEMENT & YOU

Healthcare help when you need it

Our CASE MANAGERS

Case managers are registered nurses (R.N.) and certified case managers (CCM), which means they have the experience and knowledge to serve patients who have complex challenges. Health Advantage case managers have experience in acute care, critical care, emergency department, home healthcare, high-risk neonatal and maternity, rehabilitation nursing, cancer care, surgery, orthopedics, respiratory and more.

Each case manager upholds the professional and ethical standards of the Code of Professional Conduct for Case Managers.

How a CASE MANAGER HELPS

A case manager is part of your healthcare team and will talk to you and your doctor(s) to help develop a plan for your needs. There are many perks when you have the help of a case manager.

Better communication: You'll have better, more productive conversations with your doctors and other providers. A case manager will make sure you understand what to ask during office visits, and help you get the information you need.

Help you stay healthy: Your case manager helps you discover new ways to stay healthy through preventive care. He/she will identify local resources available to you.

Get the right healthcare: Make sure you see the right providers at the right time (in the right place). Part of the case manager's job is to guide you through the healthcare system and get the help you need.

Make better decisions: Learn how to participate in your own medical decision-making. Case managers help you understand your clinical condition and how your health insurance benefits will support your treatment. You'll be equipped with the information you need to make decisions about your condition and your treatment options, and you'll get help understanding your health insurance coverage, too.

With a case manager, you're more informed and more likely to follow your treatment plan. Learn more about having a case manager as part of your healthcare team at healthadvantage-hmo.com/casemanagement.

AR BENEFITS

Let's Talk about CASE MANAGEMENT

The healthcare system can be complex. Dealing with a surgery, lifelong illness or being diagnosed with cancer can be overwhelming. When you're sick, a case manager can help you understand your condition, the healthcare system and be your advocate. Case management is designed to help you:

Find your way through your
healthcare coverage

Understand your
health issues

Participate on your
own healthcare team

Identify problems that prevent
you from getting better

Follow your
treatment plan

Case management is available to enrolled employees at no additional cost. If you're in the hospital, you may visit with a Health Advantage case manager.

YOUR HEALTH IS IMPORTANT!

Your health plan features case management to help you stay healthy.
