SCSO

State Cybersecurity Office

FACTS

SCSO is the front line of defense to ensure that incoming and outgoing data transmitted across the state network is:

- Secure
- Private
- Confidential
- Inaccessible to hackers

*“Thank you for getting our hosted server accessible and secure. We value the support we receive from the entire DIS team.”
Pulaski County Special School District*

Business Benefit

All public entities on the state network benefit from our security mechanisms and layered design of defense.

- 24/7/365 monitoring
- Intrusion prevention tools
- Firewalls
- Malicious traffic filters
- Trusted infrastructure points website requests to the valid location

These tools reduce the risk of a data breach and the financial risk of mitigating a breach by the state.

Future Vision

A mature cybersecurity program across state government will help safeguard and protect critical information and data assets.

- Create a cyber aware workforce
- Phase out large, expensive intrusion protection systems to lower costs
- Implement advanced endpoint solutions for more accurate threat reporting and shorter threat remediation response times
- Leverage endpoint protection to stop and isolate threats before they can spread

Cybersecurity at a Glance

1,000+

Firewalls prevent outside attempts to gain access to state computers

10 Million

Daily attempts are denied access to the network

5+ Billion

Network traffic records managed each day by security event management systems

2,100+

Endpoints protected by cyber defenses

70,000+

Daily attacks blocked from outside the network
